

SUPPORTED LEARNING NEWSLETTER

TERM TWO

Welcome to our second newsletter of the academic year.

What a term this has been! Year 7s moved into their sets and we have been busy with lots of our interventions. We had the brilliant flexi-learning day where we all got to enjoy something a little bit different from our usual days.

A message from the SENDCo- We continue to raise our profile in school. There has been some lovely feedback from you, our parents and carers, as well as outside professionals. You all recognise the wonderful work that is going on and how we are making a difference to the lives of the young people we work with. Thank you!

This term has seen our Outdoor adventurers finish their 10-week provision. This has proved extremely successful, and we look forward to welcoming a new cohort in January. The gardening group have braved the weather each week and you can read a little of what they have been up to in this newsletter.

You might have noticed the front of the school has been updated and is no longer the tired green colour it was! Local company Joedan have supplied and fitted all new windows and doors to the main block building. Joedan owner, John Purcaro kindly donated 20 chocolate advent calendars to the school!

The Supported Learning Space remains popular at break and lunch times.

It's somewhere quieter for students to access away from the busy playground. There's an opportunity to play games and socialise with peers, helping to build self esteem and confidence.

Flow Club is in full swing during lunchtimes where our students can come to experience sports in a more relaxed environment.

It also gives them time to build up some great friendships and it's so nice to see!

As always, please do get in touch via SENDAdmin@severnvaeschool.com

if you have a query or question about anything in relation to your child.

A member of the team will respond to you at their earliest convenience.

Have a wonderful Christmas break!

Julie Williamson - SENDCo

Our garden intervention groups have been busy building a new compost bin from recycled materials. Both groups involved put together some sketches of an idea, which they then built using pallets. The group used fence posts and handcrafted mallets (made by the Outdoor Ed group) to assemble the rest of the bin.

The second group spent the session practising their knot tying, and then finally adding a roof to the compost bin. They all worked really well as a team and it's nice to see the progress they are making in our garden area!
